

A close-up photograph of two wooden salt and pepper shakers. The shakers are made of wood, with one side painted a vibrant red and the other side showing the natural light-colored wood grain. They are shaped like inverted triangles with rounded corners. The shakers are positioned diagonally, with the red-painted shaker in the foreground and the natural wood shaker slightly behind it. The background is a soft, out-of-focus light gray.

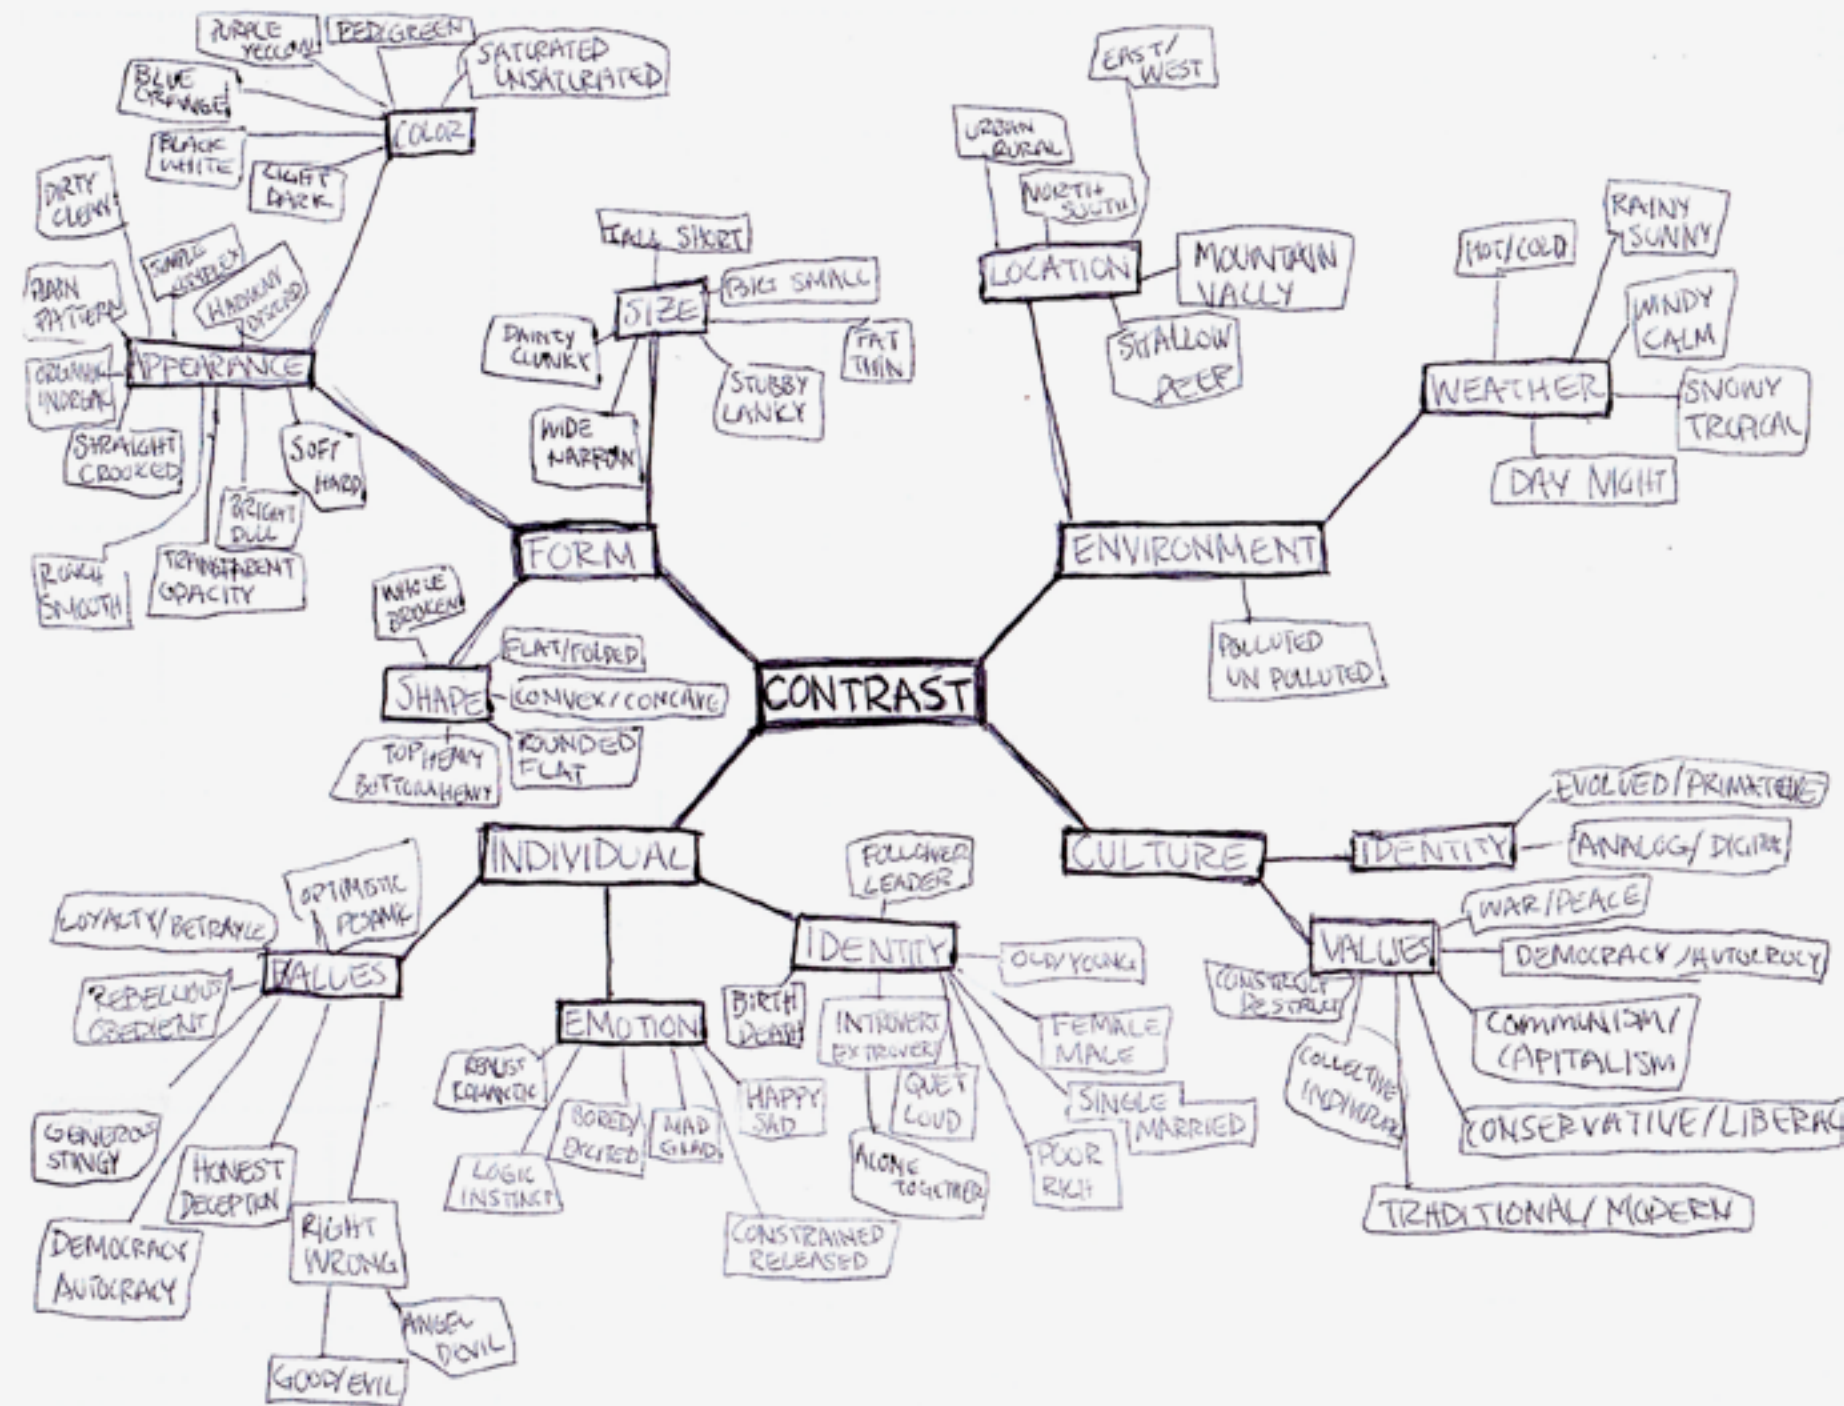

SALT & PEPPER

1

Salt and Pepper Set Project Intro

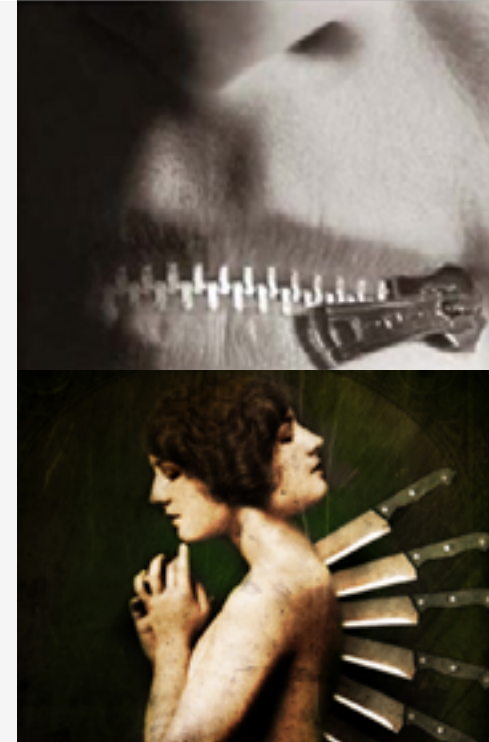

Design a wooden pepper grinder and salt shaker set. The design is to be primarily of wood and is to work using an existing pepper grinding mechanism.

In addition to meeting functional requirements, the forms have to illustrate visual contrast. The set is to create emphasis and interest through the use of opposing qualities among figures and forms. One of the two items is to reflect the opposing quality of the other.

Orthographic Drawing & Shop Plan

This is the Dimensioned orthographic layout drawing for my final concept, which was necessary to be completed in order to construct the salt and pepper set precisely. The accuracy of this drawing will translate into the final salt and pepper set.
